Sleep Well Counselor

Every day Every **TrueServe** Process Server is held accountable by the:
GPS verified , Date Stamped,Time stamped PHOTOGRAPHIC Proof evidencing that the Process Server was where they said they were when they said they were there.

Server Feasibility Reports (below) measure distance and verifies the servers route was in fact possible. The system then scores each stop for time it should take and time actually taken between serves by the server.
Just another way the **TrueServe** and **TrueServe** alone gives you "Proof Positive" and helps you sleep at night.
